

A**Conventional PTQ**

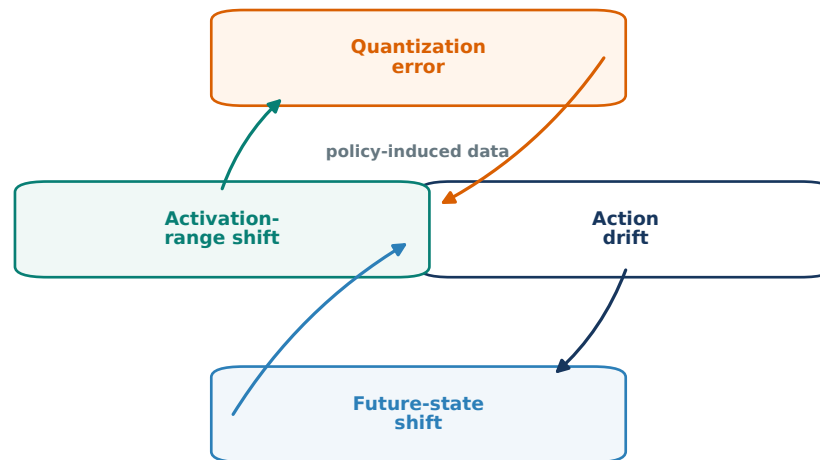

exogenous data

Assumption: deployment inputs follow calibration data

B**Quantization-control loop**

endogenous data

The policy changes the data used to evaluate it

C**Full-context response**

policy-level

Temporal control contextPhysical-sequence contract
prefix • SE(3) • stitch • tail**Whole-policy precision context**Local evidence proposes
complete policy decides • may abstain**Deployment-distribution context**Input-conditioned channelwise A8
no frozen range lookup

time context × model context × deployment context
